

Encompass

Search less. Care more.

Overview

Encompass is a cost-effective solution that helps hospitals manage mobile asset inventory, reduce total cost of ownership and achieve better capital allocation. It enables healthcare professionals to manage all critical mobile assets in real-time with accuracy and ease, so that they spend less time searching for equipment and can concentrate on providing quality patient care.

Why it's needed

58% of hospital assets sit idle on average at any given time¹

\$4K value of equipment lost or stolen, per hospital bed/year²

How it works

Encompass is a combination of hardware and web applications that tracks assets throughout the healthcare facility. Asset information is displayed in a web application that can be viewed on computers, phones and tablets. Simply enter the name of the asset you're looking for, and Encompass provides all of the relevant information you need for that asset.

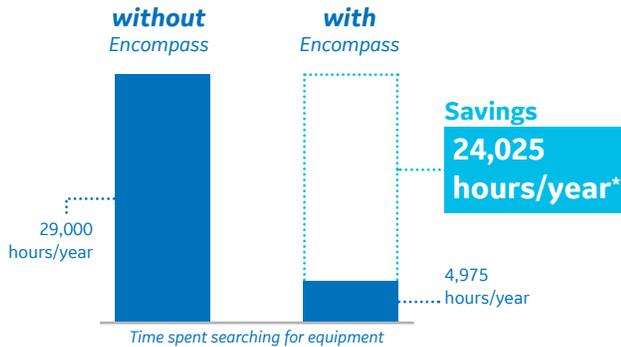

Encompass

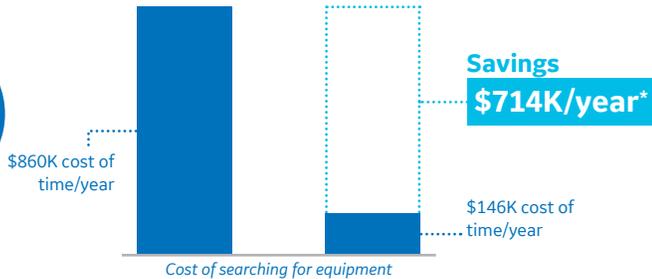

Search less. Care more.

Operational efficiency

Financial performance

Patient care

Sub-optimal patient experience **Enhanced patient experience**

Why Encompass?

Improve operational efficiency

- Mobile assets quickly located
- Nurses can spend more time with patients, rather than looking for equipment
- Preventive maintenance in compliance

Strengthen financial performance

- Equipment surplus and related maintenance cost reduced
- Equipment service life extended
- Staff productivity and efficiency increased

Help enhance patient care

- Caregivers can focus on patient, rather than equipment
- Fewer delays in care help improve patient safety and satisfaction
- Potential for use of non-serviced machines reduced

* In a small to medium size hospital, based on average 24-minute search time without Encompass, and 4-minute search with Encompass

Things to consider...

Seamless, wireless installation

- Noninvasive and easy to maintain
- No open ceiling or drilling in the walls
- Uses low-energy Bluetooth technology

Cost effective

- Lower cost of entry
- Versatile, subscription-based service
- Easy to scale

Easy to use

- Intuitive user interface
- Mobile application
- Built on an open source platform

Healthcare expertise

- Decades of experience in digital healthcare technology
- 15 years of experience in real-time location services industry
- Full suite of software, equipment and biomedical services
